PROFESSIONAL SUMMARY

Mobile application developer with 4+ years of experience delivering reliable Android and iOS applications using **.NET MAUI** and **Xamarin.Forms**. Experienced in fresh application development, Xamarin-to-.NET MAUI migration, offline-first architecture, REST APIs, responsive UI, two-step authentication, Google Play deployment, production version control and field-user support.

CORE SKILLS

Mobile: .NET MAUI, MAUI Blazor, Xamarin.Forms, Android, iOS, C#, XAML, MVVM

Data & Integration: REST APIs, JSON, SQLite, local databases, offline sync and transactional data handling

Security & Reliability: Password plus OTP authentication, device validation, lifecycle checks, retry handling

Delivery: Git, Visual Studio, Postman, Google Play Console, APK/AAB builds, staged rollout, hotfixes

PROFESSIONAL EXPERIENCE

Software Developer - Xamarin & .NET MAUI

Venkateswara Hatcheries Private Limited | Dec 2023 - Present | Pune, India

- Designed and developed **BW Uniformity** as a fresh standalone .NET MAUI Blazor application with responsive field workflows and password-plus-OTP authentication delivered through WhatsApp.
- Migrated and stabilized **Parent Production, CBF and Delivery Challan**, modernizing legacy Xamarin/Android behavior for current .NET MAUI and Android releases.
- Engineered offline-first workflows with SQLite, transactional master-data replacement, resilient synchronization and safe retention of pending field transactions.
- Implemented application and device validation across login, resume, download and upload flows, with user-friendly failure handling.
- Owned Google Play Console builds, testing, staged deployment, production releases and hotfixes using APK and AAB packaging.
- Implemented version checks and mandatory-update flows so field users remain on the latest supported production release.
- Delivered adaptive interfaces for varied Android devices and coordinated zone-wise QA before production rollout.

Software Developer - Xamarin

WAi Technologies | May 2022 - Nov 2023 | Pune, India

- Developed cross-platform Android and iOS applications using Xamarin.Forms, C#, XAML and MVVM.
- Built adaptive interfaces and reusable controls, integrated REST APIs and handled real-time mobile data updates.
- Collaborated with backend and QA teams to diagnose defects and deliver stable production releases.

Selected Application Delivery

BW Uniformity | Fresh standalone development

Architected and built a responsive .NET MAUI Blazor field application from scratch, including password-plus-WhatsApp OTP sign-in, keyboard-stable mobile screens, lifecycle validation and supported-version handling.

Parent Production | Migration

Migrated an offline-first production workflow with division-scoped SQLite master data, atomic download/upload processing, version checks and zone-wise QA rollout.

CBF | Migration

Modernized a legacy field workflow with reliable master refresh, transaction upload confirmation, lifecycle-aware device/version checks, retry handling and mandatory Play Store updates.

Delivery Challan | Migration

Migrated the Android application and release pipeline, separated debug APK and release AAB behavior, resolved resource/build issues and validated production deployment on physical devices.

PERSONAL PROOF OF CONCEPT

Digital Farm - Independently designed POC for secure sign-in, farm and controller details, electrical readings, live weather, ESP32 connectivity, controller-offline safeguards and remote motor operations.

EDUCATION & CERTIFICATION

Bachelor of Engineering - Information Technology
Pravara Rural Engineering College, Loni | Jun 2016 - Aug 2021 | Aggregate: 70.80%

Microsoft Azure Fundamentals (AZ-900)

EARLIER EXPERIENCE

WAi Technologies, Pune - Xamarin & REST API Development Intern | Nov 2021 - May 2022

Infinity Automation Systems Private Limited - Java & SQL Intern | Jan 2020 - Feb 2020
